PRESENTS: DISASTER Response Training

Basic Disaster Life Support (BDLS) v3.0
(Dates And Times)

The Basic Disaster Life Support™ (BDLS®) course is a seven hour competency-based, awareness-level course that introduces concepts and principles to prepare health professionals for the management of injuries and illnesses caused by disasters and public health emergencies. The course builds upon, applies, and reinforces information presented in the Core Disaster Life Support® (CDLS®) course. This includes application of core principles and concepts in emergency management and public health as introduced in the CDLS course through the PRE-DISASTER Paradigm™ and DISASTER Paradigm™. The primary focus of the BDLS course is incorporation of an "all-hazards" approach to mass casualty management and population-based care across a broad range of disasters. Measures to ensure and enhance health workforce readiness are emphasized throughout the course. This includes a consistent and scalable approach to workforce protection and casualty management, as well as, mass casualty triage and fatality management.

Advanced Disaster Life Support (ADLS) v3.0
(Dates and Times)

ADLS® is an advanced practicum course for the trained BDLS® provider. It is an intensive, 2-day course that allows students to demonstrate competencies in casualty decontamination, specified essential skills, and mass casualty incident information systems/technology applications. Using simulated, all-hazards scenarios and mass causality incidents, ADLS® makes use of four interactive sessions in which participants treat simulated patients in various disaster drills and situations. Training is focused on the development of hands-on skills to allow participants to apply the knowledge learned in BDLS®.

ADLS is an active, hands-on course. Students should dress comfortably and be prepared for outdoor activities.
